INTRODUCTION

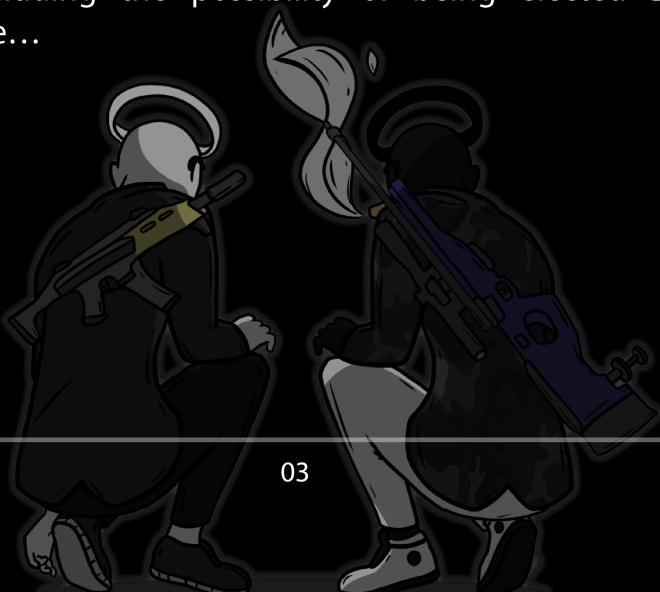

The world of gangsters is a universe that speaks to a large part and gives multiple ideas. Although the solutions and innovations that we have implemented in our games can be used in other contexts, we have made sure to adapt them as much as possible to the world of gangs.

xGangsters are 2D characters from a collection of 3000 NFT's. There are multiple different gangs that team up and ally with each other based on their needs. Every problem between the gangs must be settled according to the official rules established at the time by the largest criminal association in the city. Everyone maintains order in their own way, but to impose themselves on others and claim great notoriety, they must acquire experience in fight...

Each gangster has his way of apprehending the world. Some have trained throughout their childhood to be the fastest, others handle weapons with great efficiency, some are stronger than others but strength is not all! Mobsters must show adaptability in all skills to be able to claim the title of king of the city.

While some are dedicated solely to fight, another gang reigns supreme in the shadows. The Originals Gangsters are from another collection of 333 NFTs with the same assets as other gangsters except their body represented by shadow & angel skins. All Original Gangsters will have advantages, including the possibility of being elected Director of Organized Crime...

COLLECTIONS

Gangsters are a part of the population who are fundamentally outside the law, very arid, and thirsty for more or less illegal activity and practice. Within their culture we find different types of gangsters with different origins, specialties and way of being. They are all different from each other, but in reality they have the same dream, that of being the strongest and most influential of the gangsters.

The first collection (Original Gangsters) will only contain 333 NFTs with gangsters recognizable by their Shadow & Angel skin. This collection of OG will only allow holders to participate in the Gang'Election. Afterwards, we really want to reward the OGs who have believed in us, through different types of rewards, and merchandise.

The second collection (xGangsters) will contain 3000 NFT's. They will be able to have all different skin types, with the exception of Shadow & Angel skins which are reserved for the OG collection. The human race is the one that is present in greater numbers due to their seniority. But there are other rarer species of gangsters that have appeared in the city much more recently (more info on Discord). The 3000 collection will also have access to the Gang'Wanted mini-game.

THE TEAM

The xGangsters team is embarking on the NFT adventure in order to offer something innovative. Our team is made up of young entrepreneurs. Our passion for the world of web 3 and the desire to undertake brought us together for this project. What motivates us the most is the experience that we will each gain in our fields.

Our primary goal is to create a strong community around our project. We want to implement our project in total transparency with our community. We rely on it to give us their opinions and preferences about our various content.

ALEX "GUIBZON" GUIBRETEAU

Project Manager

Student in the field of web development following a professional retraining, passionate about the field of web 3.0 & particularly the Multivers-X ecosystem. The desire to undertake motivated me to set up an NFT project.

STEVEN "NAAQ" COPY

Lead Developer

Web developer after 5 years of study and a master's degree, I have been passionate about Web3 since I discovered the environment. I have always wanted to link my passion and my job. So here I am in xGangsters

SAM "YAKOU" DONA

Business & Communication Manager

Working in a Crypto Fintech within a master in Finance / Innovation, I am passionate about Web3 and the multitude of solutions it offers. Overthinker, this challenging project meets all my values.

GANG'ELECTIONS

We want to innovate by bringing something unique to our holders.

The president and his 2 associates will be remunerated for their participation up to 0.5 ELD for the associates and 1 EGLD for the president per month. They will also have a drop of NFT from a special collection...

Indeed we are going to set up an election system which will allow a candidate among the holders of the Original Gangster collection to be elected president of the organized crime for 1 month. The president will have 2 associates, together they will form the Gangsters Council.

The voting system will be done through our dApp. Only Gangsters (the holders) will be able to vote for candidates. The candidate who obtains the most votes will be elected President. The term of office of the presidents will be one month. If a president is elected for two terms in a row, he will not be able to present himself during the 3rd month. He will have to wait for a next term in order to retry his candidacy.

The two partners will be the 2nd & the 3rd candidate who will obtain the most votes. The president and his associates will have access to numerous advantages. They will have a special role on Discord, a specific propaganda channel to share their twitter accounts to give them visibility but also a specific role with the community. They will have access to private channels with the team in order to have the news in advance and will be able to communicate information to the rest of the gangsters.

GANG'WANTED

This is a mini game P2E with EGLD rewards available on our Dapp where you have to find a hidden NFT from one of Multivers-X NFT collections. The goal will be for each of our Original Gangster holders to try to find the good NFT #ID. You will be entitled to one entry per day per nft OG owned in your Wallet.

This mini-game will be presented in the form of a parchment pre-cut into a multitude of small pieces. Every day, we will reveal a fragment of this NFT. The **FIRST** gangster who finds the correct NFT ID by a response on our dApp will win the associated reward.

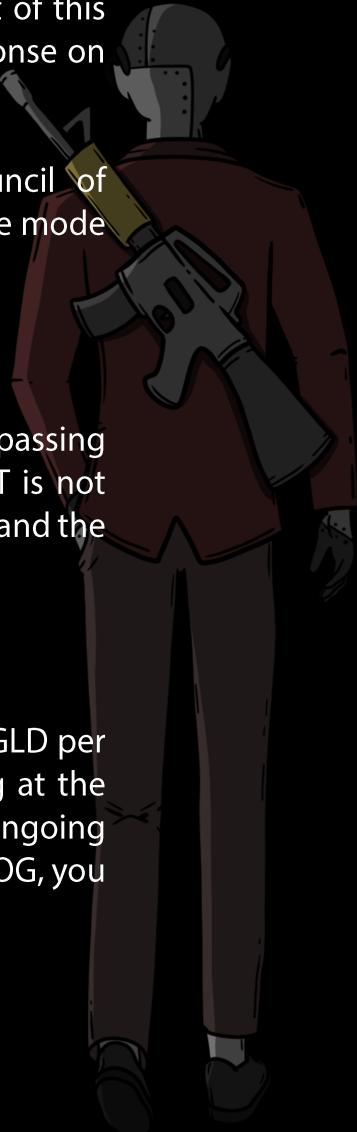

Two different operating systems will be offered to the council of gangsters, the president and his associates will have to choose the mode of rewards.

Mode 1 :

Launch of a Wanted session, starting kitty: 0.5 EGLD. With each passing day, the prize pool will increase by 0.5 EGLD as long as the NFT is not found. This means that if it is 7 days after the launch of the jackpot and the NFT is still not found, there will be 3.5 EGLD to win.

Mode 2 :

Launching a Wanted session every two days, with earning 1 EGLD per session. This means that there will be several WANTEDs running at the same time. Each OG holder will be able to participate in an ongoing session once per day. (example: 5 wanted in progress, you have 3 OG, you can participate in 3 wanted / day).

GANG'RING

Our Gang'Ring game will be the culmination of our project. It will allow each holder of the collection to earn rewards in EGLD.

The goal of this game is to have the best possible characteristics for your character, in order to defeat your opponents in fight. You will be able to create your character from your owned gangsters.

The fights will be automated according to your characteristics and those of your opponent. The characteristics of your character depend on the elements that your NFT(s) have. Some have more skills to dodge while others have more strength to do bigger damage, others have more speed and some are better at firearms than others...

The biggest point in our game will be the fact that other partner collections will be present in the game! Imagine your gangster being able to fight against other partner collections of the NFT elrond ecosystem! All our partners will have their character in our game and it will be possible to organize inter-collection fights.
